

Water Education for Teachers!

The Workshop:

- Receive the *Project WET Curriculum and Activity Guide*
- Interactive, hands-on, activity based workshop to learn about our local drinking water resources, watersheds, waste water and water treatment and local education programs
- Receive supplementary materials including classroom maps, posters, and workbooks

Project WET (Water Education for Teachers)

Curriculum and Activity Guide is a collection of over 90 innovative, interdisciplinary activities that are hands-on and easy to use for educators of students in grades K-12. Project WET is environmental education curriculum aimed to promote the awareness, appreciation, knowledge and stewardship of water resources. All activities are aligned to The California State Public School Education Standards.

**City of Watsonville
Water Resources Center
500 Clearwater Lane**

We are excited to hold the Water Education Workshop at the new Water Resources Center in Watsonville next to the water recycling plant. Because of this location we'll be able to go on a quick tour of the new water recycling plant and learn about water in the new building.

The City of Watsonville opened its award winning "green" Water Resource Center in November of 2009. The Water Resource Center is located at 500 Clearwater Lane. The American Institute of Architects' Committee on the Environment (AIA/COTE) named the City of Watsonville Water Resource Center as a Top 10 Green Project for 2010.
