

# Slow it, Spread it,

# Sink it!

## Greening Stormwater Runoff Around Your Home

FUNDING  
AVAILABLE FOR  
PROJECTS!

The modern day framework of our urban town centers and rural neighborhoods is made up of hard surfaces that drain excess rainwater (stormwater) to our streets and streams contributing to flooding and carrying with it a variety of pollutants. Poor drainage around our homes can lead to costly building repairs and may even be unhealthy for our families. Come learn practical and eco-friendly ways to protect your property and the environment from the effects of stormwater runoff.

### Highlights:

- Learn practical and eco-friendly ways to **beautify your landscape, protect your home, improve water quality, reduce flooding, and help the environment**
- Find out about a **free professional stormwater evaluation for your home**
- Receive information on **funding for "green" stormwater projects on your property**
- **Tour a local residence** to see green stormwater techniques at work!

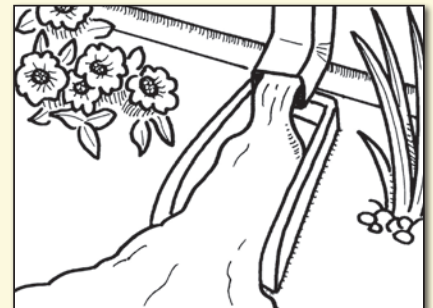

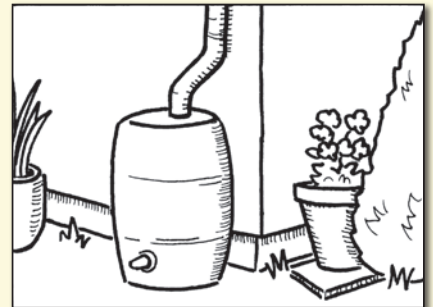

Don't miss this exciting **FREE** workshop!
